

Product Information

DiGiGrid DGS-XL

Used on major tours and in pro studios, the DiGiGrid DGS-XL Extreme server will let you run as many Waves and other SoundGrid-compatible plugins as you want, on as many channels as you've got, and give your live shows studio-grade sound. For example, you can throw plugins modelled on the world's top consoles on each and every channel, and basically make your mixer sound like a classic top-tier desk.

The DiGiGrid DGS-XL incorporates a 4 port PoE capable switch, perfect for Live applications where additional DiGiGrid Desktop and rackmount interfaces are going to be used.

- Adds massive processing power to your system
- Ultra-low latency: as low as 0.8ms at 44.1, 48, 88.2 & 96kHz
- 2U Rackmount Chassis
- i7 Extreme SoundGrid Server
- Integrated 4 port Network switch with PoE

DiGiGrid Advanced Audio Interfaces
